**THE NORMAN PEOPLE,**

And their EXISTING DESCENDANTS in the BRITISH DOMINIONS and the UNITED STATES of AMERICA. [Shortly.]

This work is an attempt to throw light on English ethnology by tracing the national origin of individual families. It is shown that a third of the English race, including almost the whole of the upper classes, are of Norman descent, and bear the surnames borne by their forefathers in Normandy eight centuries since. The corruption of names is analysed, and by the comparative system reduced to principles entirely in accordance with the discoveries of modern philology. Authentic pedigrees showing the Norman descent of very many English families and of the great majority of the existing peerage are given. The work tends to show that in the eleventh century the numbers of Normans, Danes, and Anglo-Saxons in England were about equal, and consequently that the majority of the English race is of Northman, not of Anglo-Saxon origin.
